Concept

Elegant, Simplicity, Unique. Cutting-edge technology for lock. Safety and ultimate convenience without compromise. Extremely low power requirements, a minimalist body and highly circumstances compatible. This is the principle of our design.

All New RULE

It is the summit for all levels lock championship

Outside part

Minimalist and robust design

Various ways to open a door

NFC input(opt.)

RFID card input (13.56MHz ISO/IE14443/Mifare)

Mechanic key

Bluetooth input

Optical fingerprint input(opt.)

Patented dynamic password input

Patented deadbolts operated by rotating handle upwards

Grade 1 certification- Highest Grade Security The strongest grade ANSI recognizes for any residential or commercial product.

Inside part

Symmetric design

10 shortcut keys for convenience

Most sophisticated App for Manage all locks, keys and users.

If size matters.

SQ-9 Series

Outside part

- Minimalist and robust design
- Slide escutcheon and Handle-separated design
- Handel-separated design
- Various ways to open a door
 - NFC input(opt.)
 - RFID card input (13.56MHz ISO/IE14443/Mifare)
 - Mechanic key
 - Bluetooth input
 - 16 letters kaypd with Patented dynamic input
- Grade 1 certification
 - Highest Grade Security The strongest grade ANSI recognizes for any residential or commercial product.

Inside part

- Symmetric design
- 12 shortcut keys for convenience
- Most sophisticated App for Manage all locks, keys and users.

PM-X

Most Advanced technology applied

Fast function keys and dedicated power management increase the life of the batteries greatly

Most Convenient Way to Open Door

An advanced 3-in-1 access including PIN code, RF card and Mechanical Key

Vogue and Taste

Elegant, Simplicity with international patents

ANSI Grade 1 certification

Highest Grade Security The strongest grade ANSI recognized for any residential or commercial product

Grade 1 mortise lockset inside
3 hours fire rating compliance.
Emergency external battery terminal(micro USB)
RFID card/ PIN/Mechanic key Access
Power check function
Low Battery indicator
Volume adjustable (4 levels including mute)
Invisible mechanic keyhole
Auto-Locking
Door opening alarm
Pull exterior lever upward can lock deadbolt

Specification

Door Thickness
45-95mm.

Backset
70mm

Latch
70mm

Mounting Bore Distance
3-7/8" (98mm) center to center

Cylinder
5 pins, Kwikset keyway standard.

Temperature
-20°C ~ 65°C. Batteries excluded.

Humidity
30%~ 90%

Password
4-12 digits in length.
1 set of programming code for function setup.
200 sets of user code for unlocking the door.

RF ID
Mifare S50 compatible and 200 cards capacity.

Material
Zinc alloy die-casting and polycarbonate.

Dimension
80mm x 28mm x 332mm for exterior trim.
80mm x 28mm x 332mm for interior trim.

Power supply
DC3V, four AA batteries(for keeping power-on during batteries replacing) for over three years use(30 entries per day).

MQ-9 Series

Minimalist and robust design
Slide escutcheon and Handle-separated design
Handle-separated design
Various ways to open a door

NFC input(opt.)
RFID card input (13.56MHz ISO/IE14443/Mifare)
Mechanic key
Bluetooth input
18 letters keypad with Patented dynamic input

Grade 1 certification

Highest Grade Security The strongest grade ANSI recognizes for any residential or commercial product.

Excellence

Lock is not just the symbol of safety. Every our product must accomplish something others have not done or said would be impossible.

Power management

Electronic door-locks suffer the frequent battery-changing issue. The more ways to open a door, the more often changing batteries. Control power drain without compromise. True gold within our product distinguished from the rest.

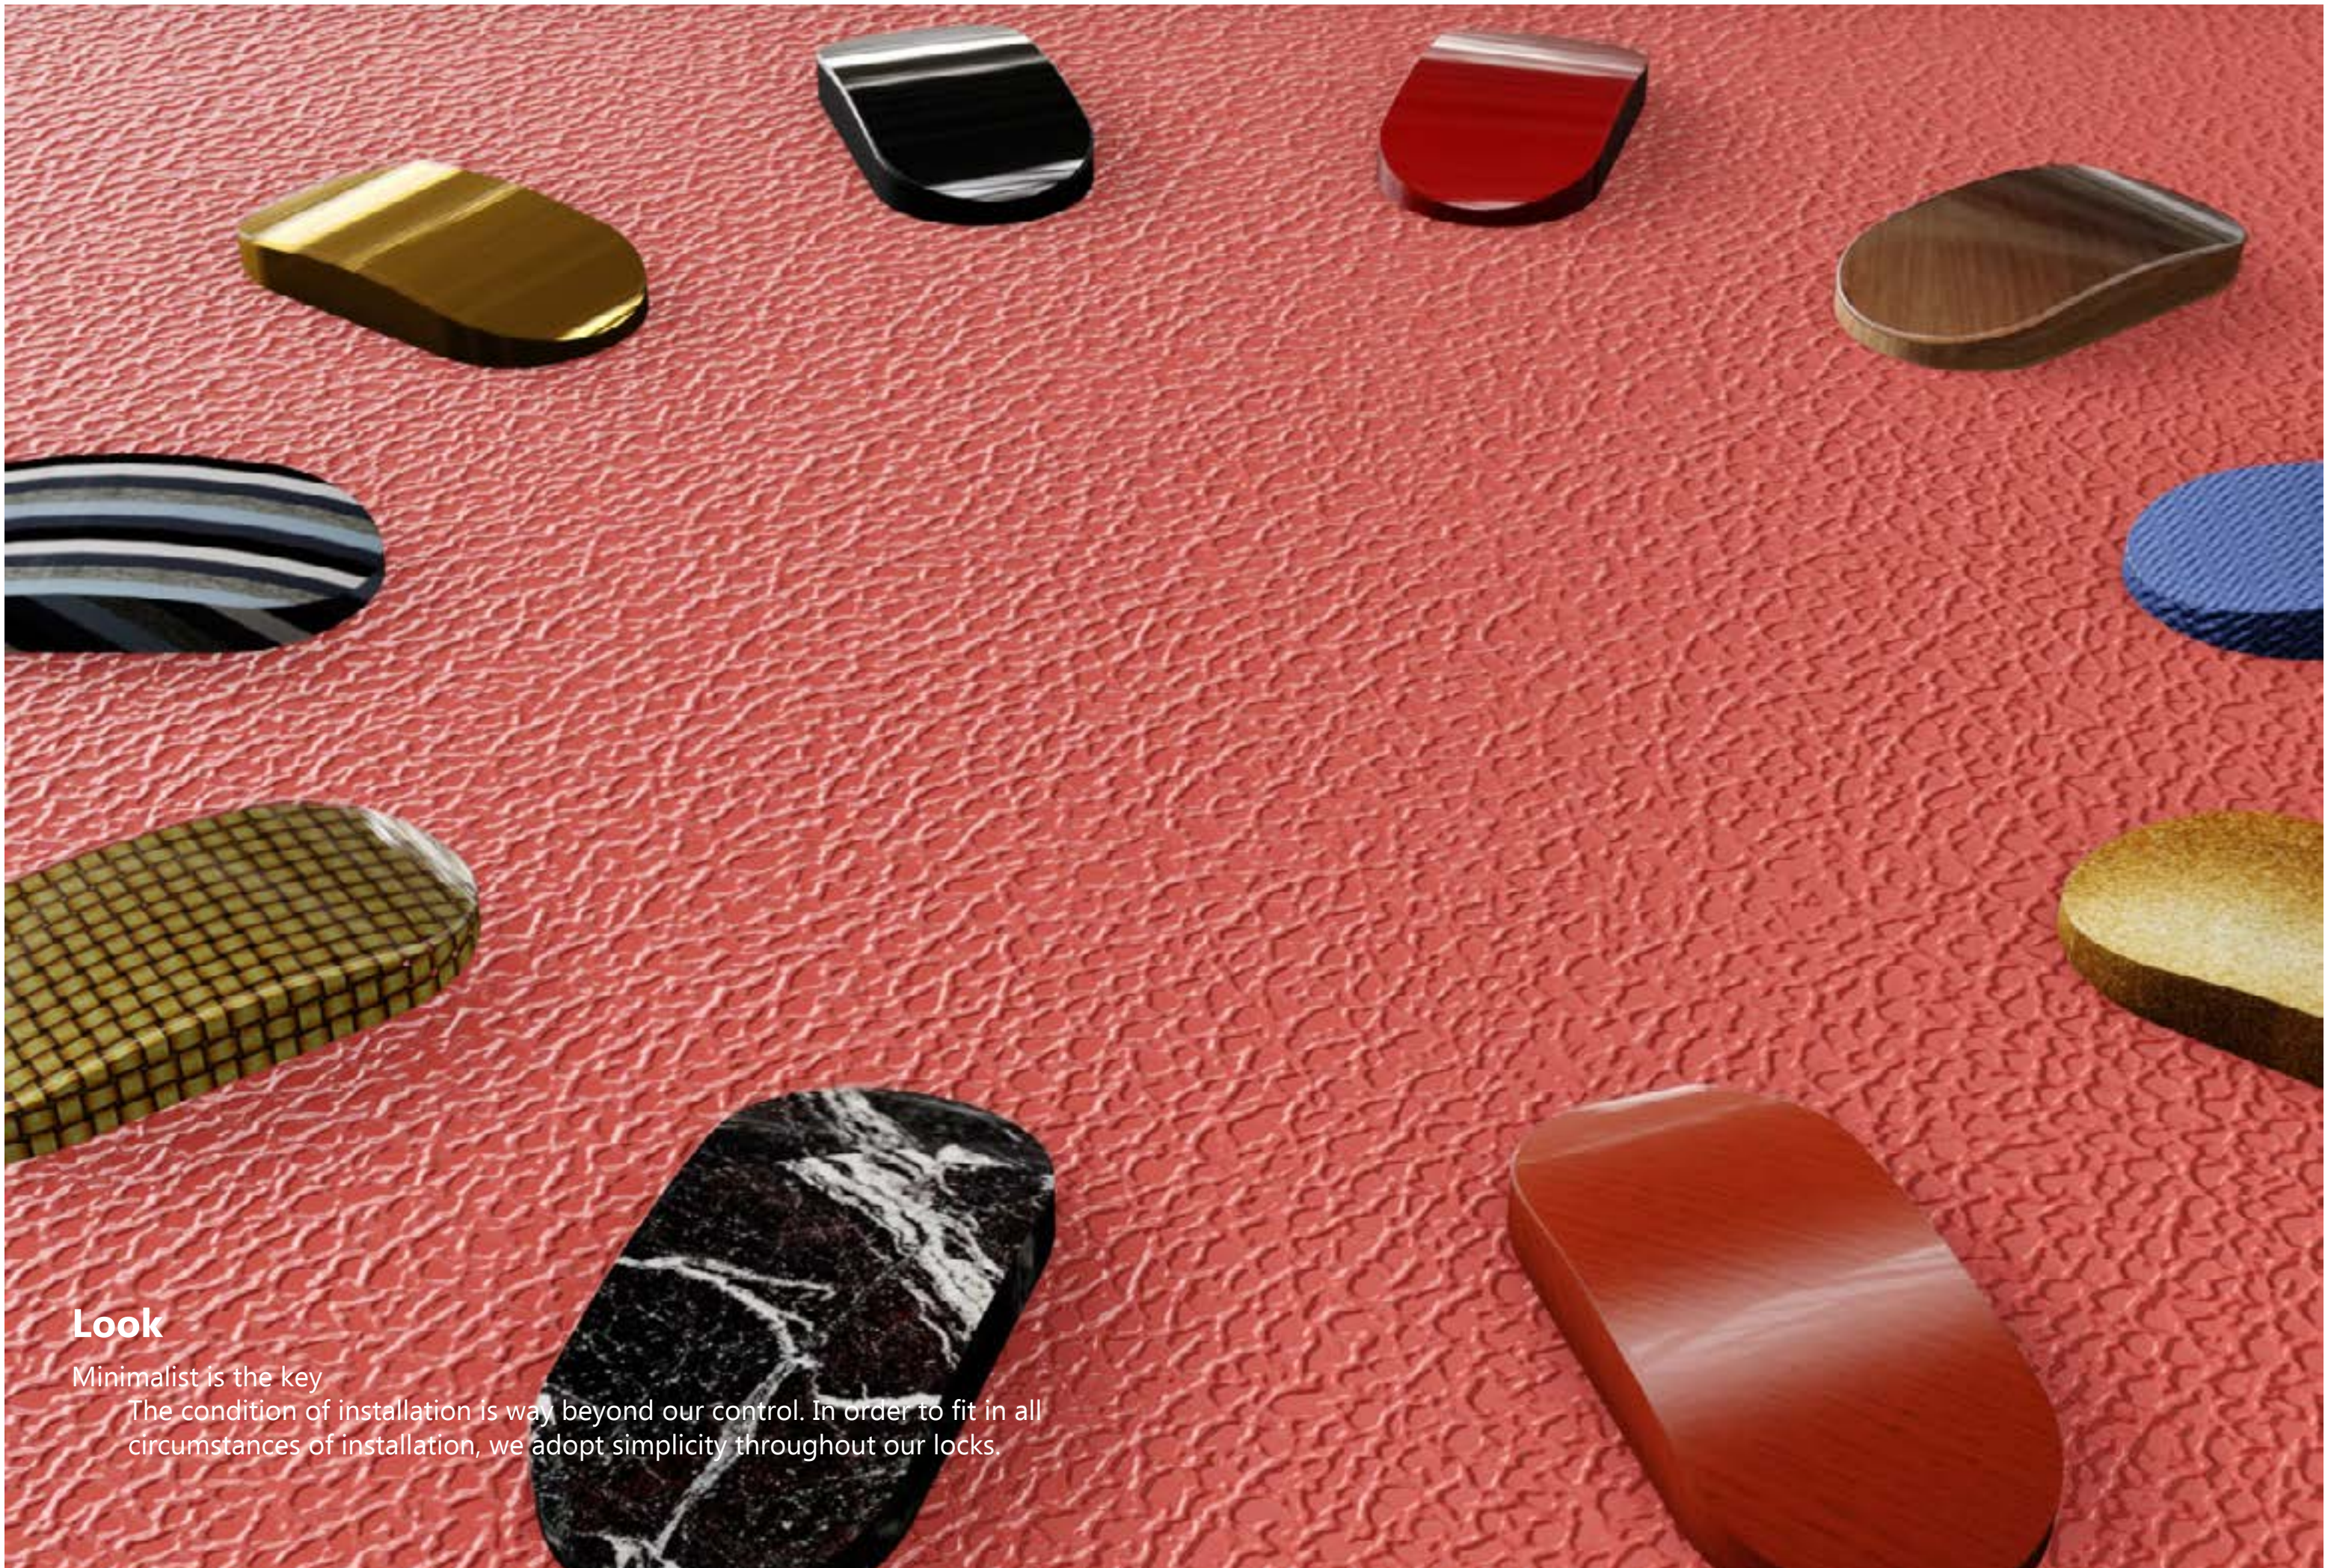

Lockset

Forget about electronic part. Srison is unique if not the best

- Equipped with ANSI Grade one lockst
- Deadbolts operated by rotating handle upwards

Look

Minimalist is the key
The condition of installation is way beyond our control. In order to fit in all circumstances of installation, we adopt simplicity throughout our locks.

Feature

ANSI Grade 1 with deadbolt closed whenever pulling exterior lever upward

200 Passwords supported

200 Fingerprints supported(opt.)

200 Cards supported

Bluetooth 4.2 & up compatible (2 sets for Stron Rule)

NFC compatible

Invisible mechanic keyhole (except MQ9)

10 Hotkeys for no-menu operation, setup in a flash

Auto-Lock & door opening alarm

Secure gesture against coercion

Directional wireless detection against anomalous followers

Off-line emergency notification

Complete and easy in-out event tracking

Most secure & easy management of locks, keys & users

Multiple locks management in the same App

Display brightness control

Alarm volume control

Key Issuing using secure digital signature

4 AA type battery (4 more AAA opt. for Stron Rule)

Battery estimation of time-out usage

Intensive and smart power management

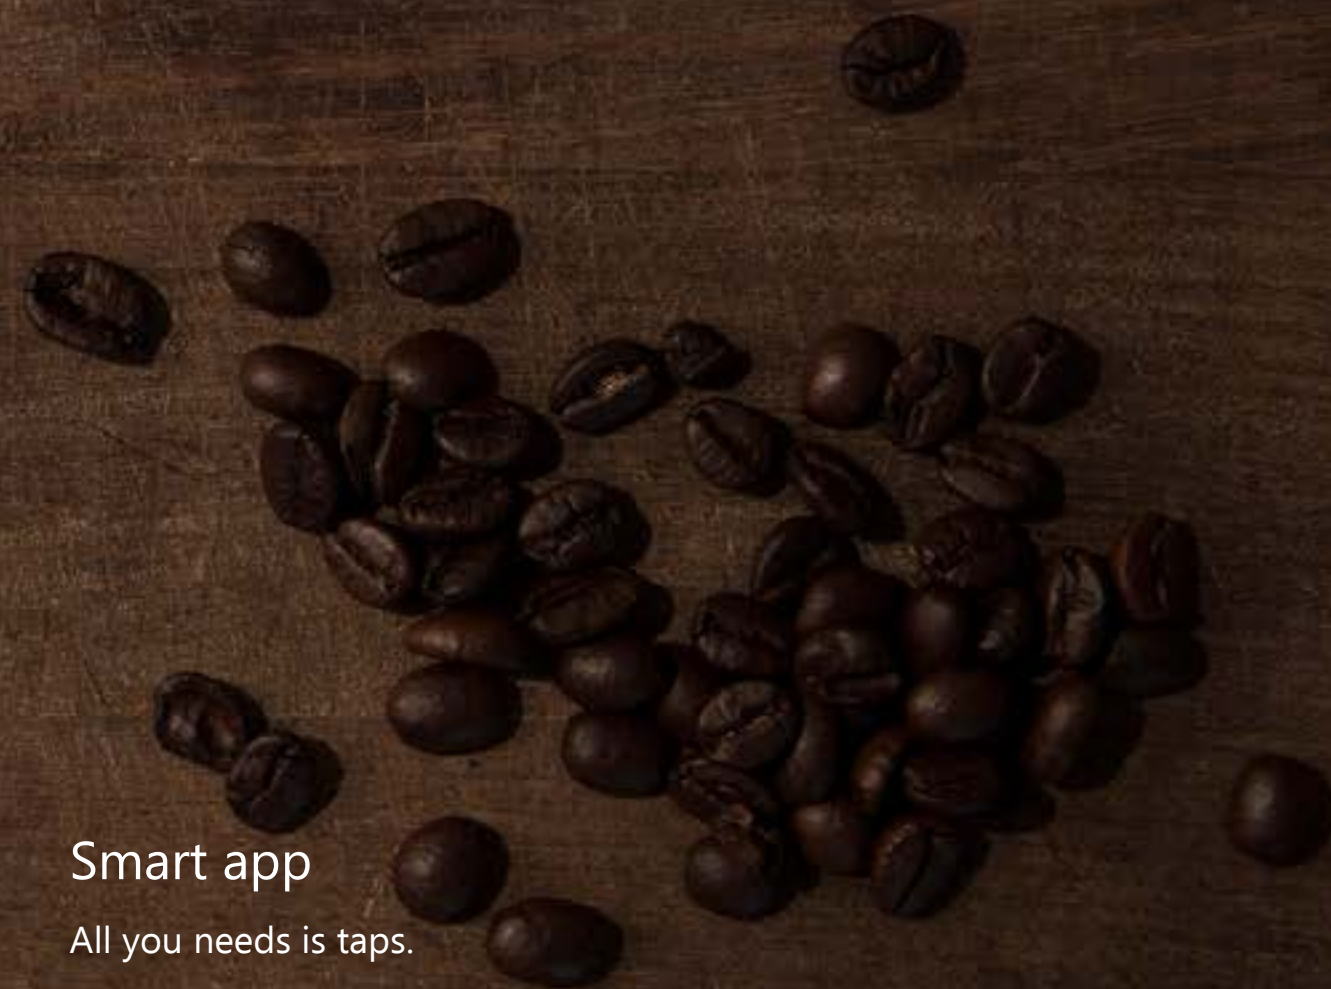

Battery life time > 3 years (30 entries per day)

Fire & earthquake alarm

Violent break-in alarm

100% splash-proof

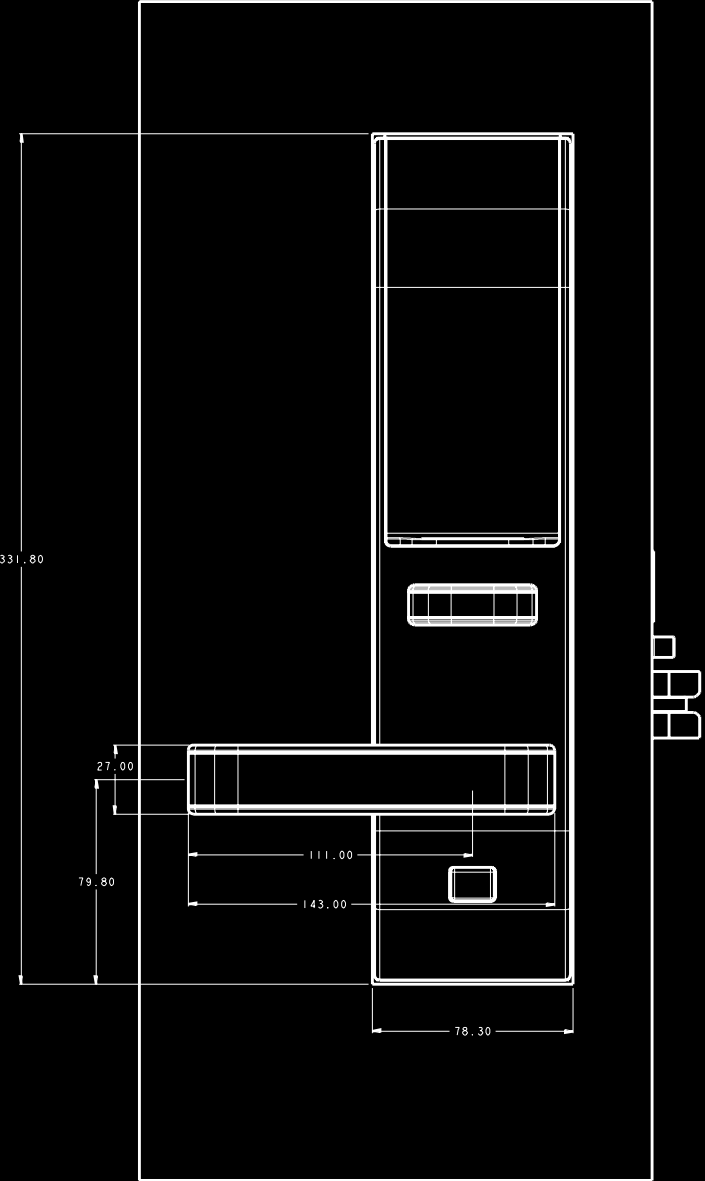

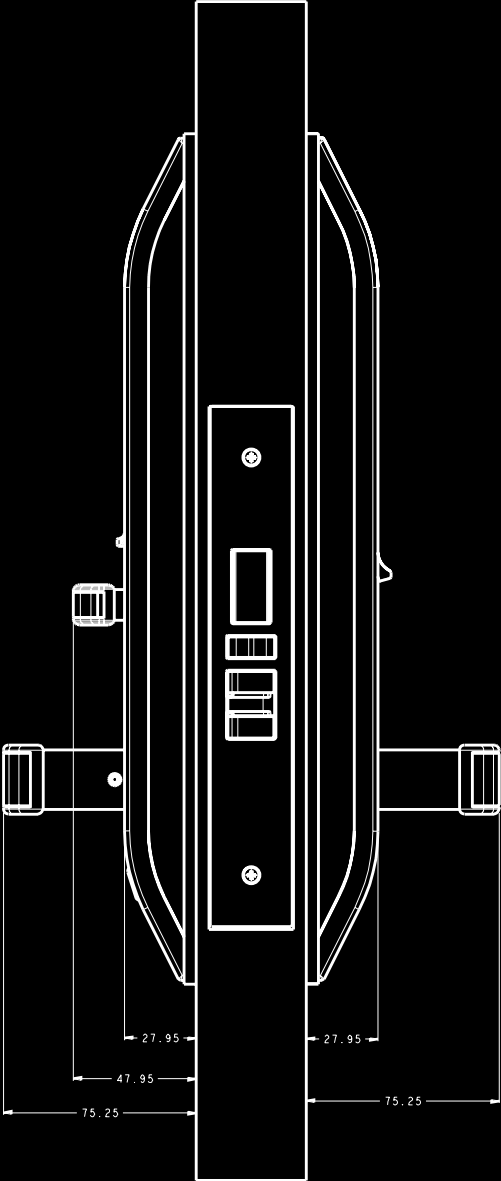

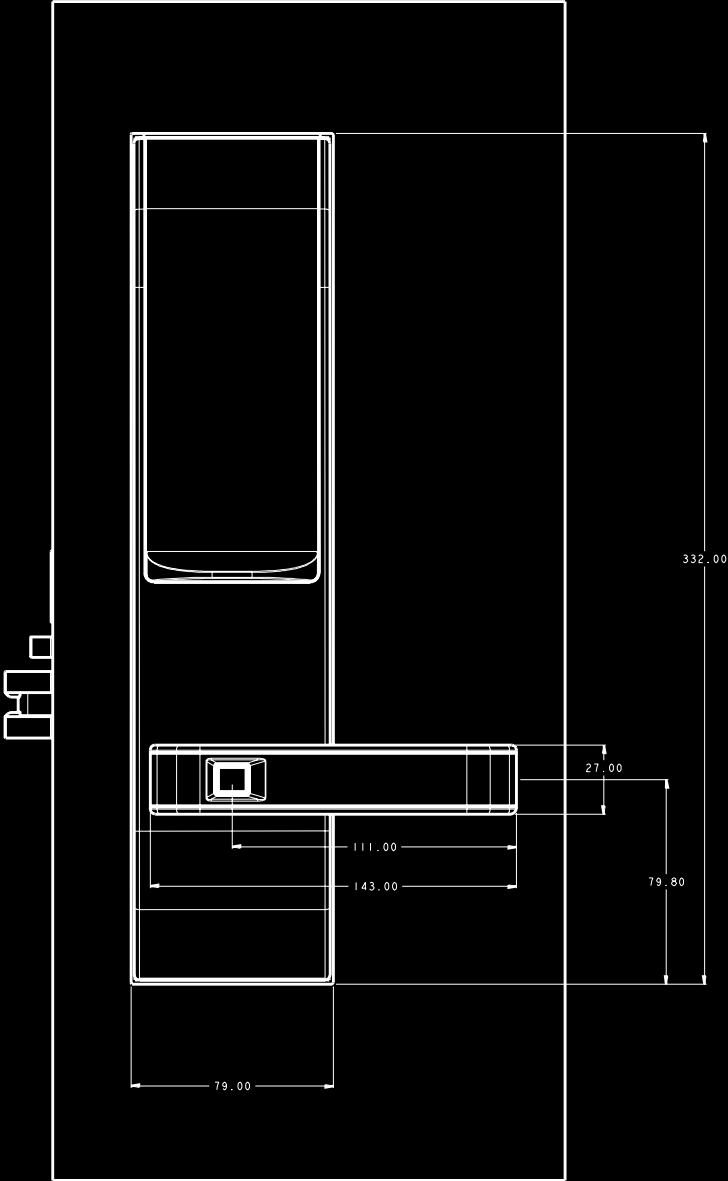

External Battery back-up micro USB terminal contact

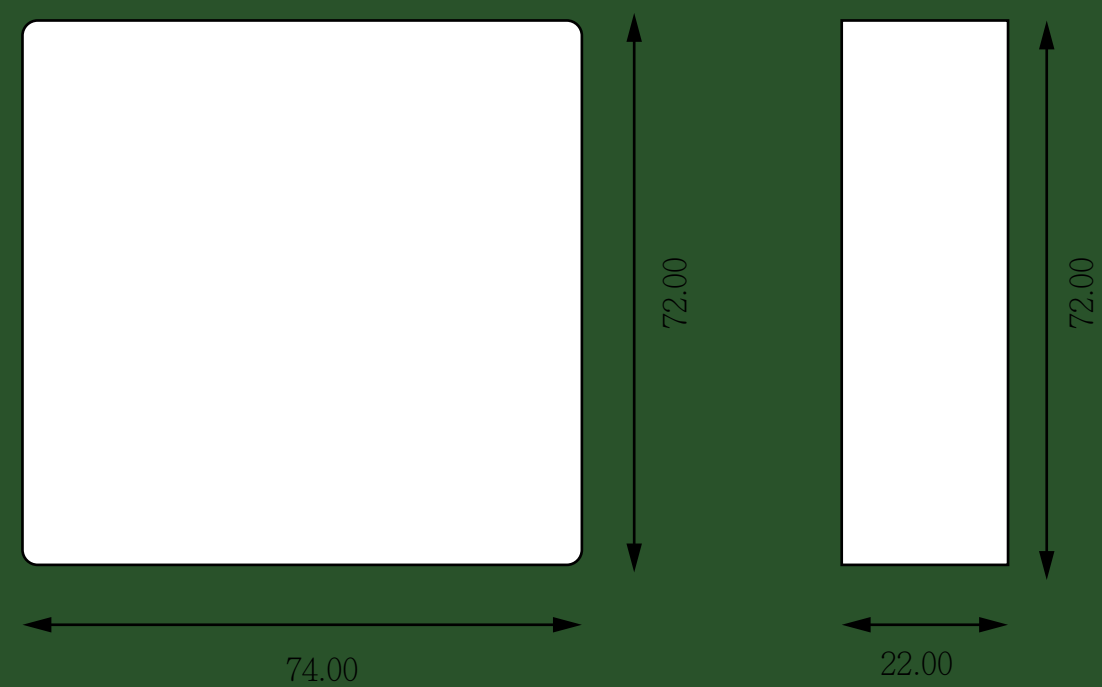

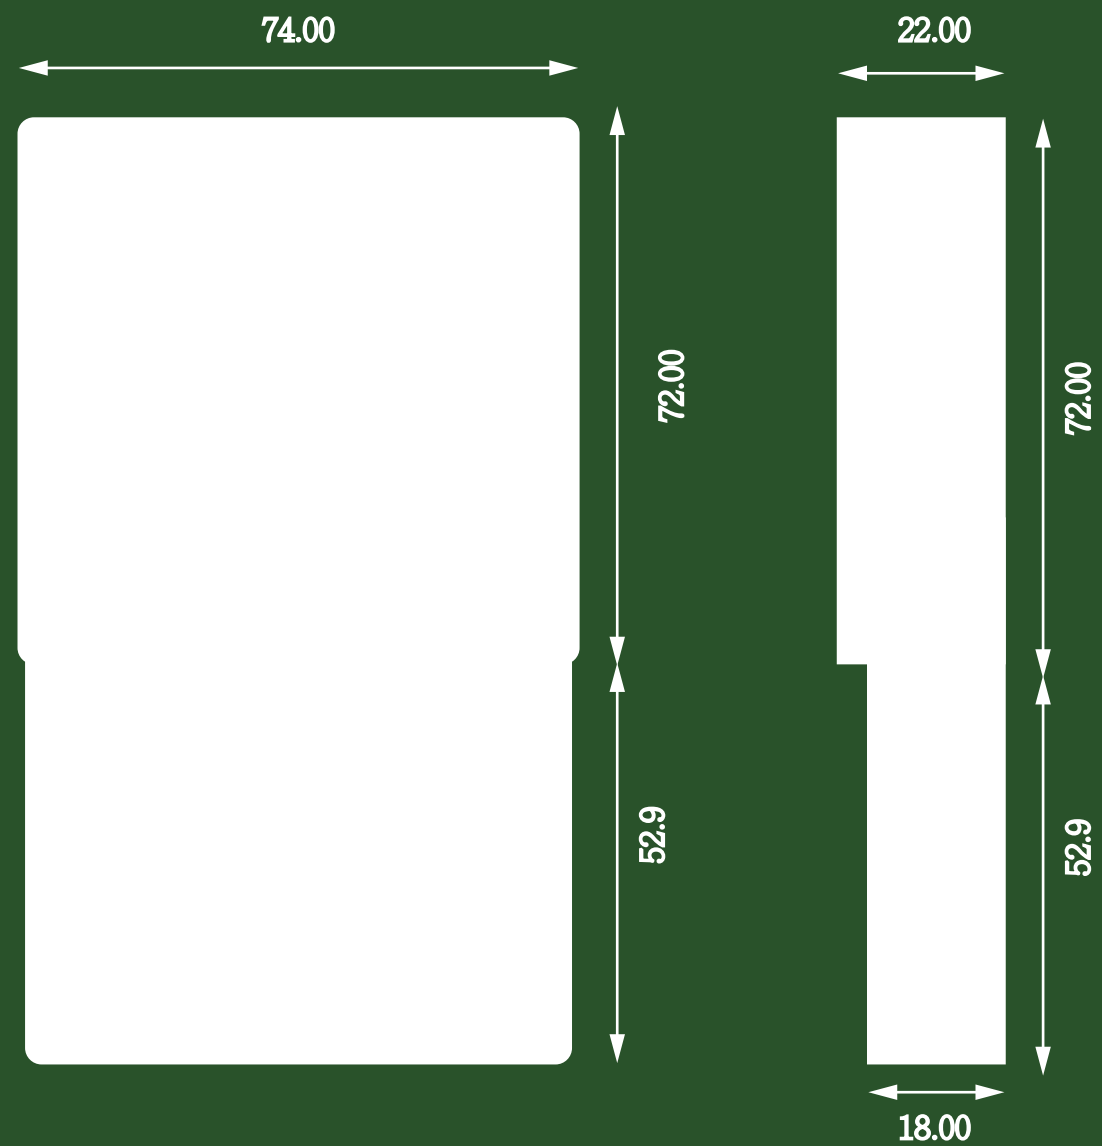

Smart app

All you needs is taps.
